The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on	<u>_</u> .	•				
2a) This action is FINAL . 2b) ⊠ This	action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is						
closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims						
4) Claim(s) 1-10 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-10 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Althausen et al.(5,840,778).

Althausen et al. discloses methods for preparing polyurethane foams by mixing and metering into a mixing chamber area and reacting materials including polyol, isocyanate, carbon dioxide and water wherein the process includes generating bubble nuclei due to pressure reduction in the direction of the downstream flow by a body reading on the throttle body as claimed, and application of the material to a surface utilizing pressure conditions, mixers, and pressure-reduction bodies in order to arrive at processes and apparatuses reading on those claimed by applicants (see the entire document).

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Sulzbach et al. (5,643,970).

Sulzbach et al. discloses methods for preparing polyurethane foams by mixing and metering into a mixing chamber area and reacting materials including polyol, isocyanate, carbon dioxide and water wherein the process includes generating bubble nuclei due to pressure reduction in the direction of the downstream flow by a body

reading on the throttle body as claimed, and application of the material to a surface utilizing pressure conditions, mixers, and pressure-reduction bodies in order to arrive at processes and apparatuses reading on those claimed by applicants (see the entire document).

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Sulzbach et al. (6,019,919).

Sulzbach et al. discloses methods for preparing polyurethane foams by mixing and metering into a mixing chamber area and reacting materials including polyol, isocyanate, carbon dioxide and water wherein the process includes generating bubble nuclei due to pressure reduction in the direction of the downstream flow by a body reading on the throttle body as claimed, and application of the material to a surface utilizing pressure conditions, mixers, and pressure-reduction bodies in order to arrive at processes and apparatuses reading on those claimed by applicants (see the entire document).

Claim 10 is rejected under 35 U.S.C. 102(b) as being anticipated by Rill, Jr. et al.(3,220,801).

Rill, Jr. et al. discloses polyurethane foam forming metering devices employing mixing elements, valves, and nozzles arranged in a manner which reads on the apparatus claimed by applicants (see the entire document).

Art Unit: 1711

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-10 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 19-36 of copending Application No. 10/311,394. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods and devices of the claims overlap in features and a manner which would have been obvious to one having ordinary skill in the art.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Suh et al. (6,005,013) and Sulzbach et al. (5,521,224) disclose methods and devices relevant to those of the instant concern.
